

## Graduate Engineering Positions

### Building Services

### Adelaide and Darwin

Become an important part of the fastest growing consultancy firm in one of the fastest growing industries.

- Mechanical Services Engineer
- Electrical Services Engineer
- Fire Services Engineer
- Hydraulic Services Engineer

These positions would suit graduates from Mechanical, Mechatronic or Electrical Engineering. Our firm is involved in major building and infrastructure projects in Australia providing consulting services in:

- Design
- Construction Supervision
- Sustainability Advice
- Building Audit Report and Upgrades
- Project Management
- Working closely with building design and construction teams

We need energetic, ambitious engineers to help us deliver optimal project outcomes with minimal environmental impact.

Your qualities should include good communication skills, time management, initiative, creative thinking and an ability to clearly relay technical information to people without an engineering background.

If you want to build your career in a progressive, leading organisation and have a passion for delivering sound engineering solutions then submit your application letter and curriculum vitae via post, in person, or via email to [lucid@lucidconsulting.com.au](mailto:lucid@lucidconsulting.com.au).
